COGNAC

As for every famous product, Cognac has its legend. It is said that the secret of double distillation was discovered in the 16th century by the Knight Jacques de la Croix-Marion. It is thanks to a nightmare that Cognac saw the light of day: Satan, wanting to have his soul, tried to boil it but did not succeed. It is when the devil threatened to re-boil it that the knight awoke suddenly and became convinced that by distilling his wine a second time, he would allow his wine to express itself in a new way.
